

K-LOVE and Air 1 Christian radio stations are both available in my area and I don't know what I would do without them. My husband and I listen to them all the time; we don't listen to any other radio stations. The encouragement and positive messages we get from them help get us through the day. I LOVE both K-LOVE and Air 1 and don't want anything to change about the stations. We have a baby on the way and want to make sure that the stations are still around for our child to listen to. We want our child to have something positive to listen to and there is no better sound than hearing a child sing praises to God!

Please don't change anything about the setup of the stations. Many of the proposed changes would increase the costs of local stations and force them off the air. For example, there is no need for staff to be present at satellite locations. There is also no need for an advisory board. K-LOVE and Air 1 are supported fully by contributions, and since they receive no federal, state or grant money, they have no need to be regulated by any outside panel. The programming does not need to represent the area, it only needs to represent those who support and listen to it and we don't want anything to change. One of the best parts about K-LOVE and Air 1 is that there are not secular commercials or ads. ALL the content is POSITIVE and acceptable for my Christian family and I DO NOT want to see that change. Please do not change anything! Leave Christian radio alone! It's only helping people and the things that are being proposed will hurt the ministry. If people don't want to support the ministry, that's their choice, but there is NO NEED to hurt the ministry through these proposed regulations.
